Binny's Beverage Depot to Open New Location in Downers Grove

The Downers Grove Economic Development Corporation is pleased to announce that Binny's Beverage Depot has announced plans to open a new location in Downers Grove. The new store will be located in the former Circuit City building at the southwest corner of Butterfield Road and Highland Avenue.

The new opening will include a complete renovation of the building with a resulting store in excess of 25,000 square feet and include a wine tasting area, an Italian-style deli as well as a bakery.

Michael Binstein of Binny's stated that he had been interested in locating in Downers Grove for some time and that the former Circuit City location was an ideal opportunity for their expansion plans. He also stated that he hopes that the new store will be open by September or October of 2009 and that the service and response he has received from all parties involved has been excellent.

The new location represents a tremendous economic opportunity for Downers Grove during these challenging times. Filling the space with a sales tax generating helps serves the community and the quick turn around of the space is an excellent indication of Binny's commitment to Downers Grove as well as Downers Grove's commitment to sound economic growth.

"The Village of Downers Grove is always working with its partners, including The Downers Grove Economic Development Corporation, seeking to retain and recruit good businesses into our village", states Mayor Ron Sandack. "Having a vibrant and sustainable business environment is absolutely vital to our Village's future. So it is truly an honor for me and my Council colleagues to welcome Binny's Beverage Depot to Downers Grove. Having Binny's come to town at any other time would be significant enough for our community; having Binny's do so now, during these turbulent economic times, is definitely a tremendous Village win."

The Economic Development Corporation will continue to work with Binny's and the Village of Downers Grove to assure a timely and successful integration into Downers Grove.
